A NEWSPAPER. -- Several years ago, we Wholesale office and store, No. 20, South Wharves, wrote and published the following article.-It has since "gone the rounds" about once a year-and is now on its annual journey through the press of the country. Let us be in the fashion, and re-publish it too.

"Muny people estimate the ability of a its editor, by the quantity of editorial matter which it contains. It is comparatively CONCENTRATED and SOLUBLE FORM the two indisan easy task for a frothy writer to pour out pensable ingredients for the growth of Plants and daily, columns of words-words, upon any enriching the soil, viz: PHOSPHORIC ACID AND AMand all subjects. His ideas may flow in "one weak, washy, everlasting flood," and his command of language may enable him to string them together like bunches of onions, and his reason may be a mount and noor."

"one weak, washy, everlasting flood," and his command of language may enable him to string them together like bunches of onions, and have his reason may be a mount and noor."

"one weak, washy, everlasting flood," and his command of language may enable him to string them together like bunches of onions, the soil, furnish all the needful Ammonia for the and yet his paper may be a meagre and poor concern. But what is the labor and the toil the land permanently benefitted so that its preof such a man who displays his "leaded mat- sence can be traced for years aferwards. ter" ever so largely, to that imposed on the self to the conduct of his paper with the phate made from bone ash or burned bone, beyer bestows upon a suit, or a humane physi- is not destroyed in Baugh's Super-Phosphate. cian upon a patient, without regard to show or display! Indeed, the mere writing part of editing a paper, is but a small portion of lecting, is far more important; and the tact tion, containing full directions, &c., &c. of a good editor is better shown by his selection than anything else; and that we all know is half the battle. But as we have said, an editor ought to be estimated, and his labors understood and appreciated, by the general conduct of his paper-its tone-its temnity-its propriety. To preserve these as rating, at the same time a mild delicious beverage. If to this be added the general supervision to the certificates beneath, he has received a Diof the newspaper establishment, which most | ploma from the STATE AGRICULTURAL SO-

find it a very agreeable employment. The of the whiskeys in general use.

BOOTH, GARRET & CAMAC. inland department of the Electric Telegraph Company in London, now employs one hundred young ladies, who receive and transmit the messages from all parts of the United Kingdom. The room in which they are lighted and ventilated. A number of long tables and ventures the room, upon flavored quality of Whiskey.

JAS. R. CHILTON, Analytical Chemist. which the instruments are placed, an attendant being seated opposite each one. There is one table for Liverpool, another for Mantowns. When not engaged at the instru- from the Grain used in manufacturing it. Resments, the girls employ themselves with needlework or reading. The room is in charge of a matron. The compensation ranges from 10s. to 25s. (\$2.50 to \$6.25) per week. Ten hours constitute a day's work. A period of six weeks is sufficient to learn the practice is required to impart efficiency and rapidity of execution. There is a bitch. rapidity of execution. There is a kitchen in which the young ladies cook their dinners, and a servant to wait upon them, with a lavatory and other appliances for their comfort and convenience. The access to the comfort and convenience. The access to the FARMING IMPLEMENTS, sex is upon any account admitted into their | nish on the most accommodating terms. department, except upon a special order .ment has proved to demonstration, that the PLOWS AND CASTINGS, proverbial ineapacity of women to keep a Ox Yokes, Cutting Boxes, Corn Shellers, secret is a great untruth. Of the thousands of important and valuable secrets which | Horse Powers and Threshing Machines, must yearly come to the knowledge of these young ladies, not a single one has ever transpired. Many of the fair operatives are closely related to individuals distinguished in literature, science and art.

How to KEEP FURS .- A few days more Herds Grass Seed, &c. and furs will be superfluous, and then comes | GUANO, BONE DUST, the process of puting them away so that moths shall not invade them. It is stated that the best way to insure immunity from destruction, is to pack all in a trunk or box lined with brown holland, first sprinkling them liberally with black pepper. This is better even than camphor, for dealers in furs are often victimized by entomolgical pets, though their goods be saturated with this powerful odor. Before packing away furs they should be well beaten, to dislodge any larvae that, despite the most scrupulous care, may be deposited in them. The superiority of pepper to camphor as a preservative to furs cubate among camphor, there is something to furnish the

A "ONE HORSE TOWN."-The Mobile Tribune has the following:

"Some few years ago a New Orleans paper said that Mobile was nothing but a "onehorse town," and in a short period it would be nothing but a "wood yard" for through boats. The wish was father to the thought. At that time, say five years ago, the population of Mobile was estimated to be not exceeding 30,000, and now no one estimates it at less than 40,000 or 45,000, and it is well known that the city is increasing faster than any city in the South, Memphis excepted. Yesterday the Battle House alone fed over 700 persons, and we have been told that every boarding house and hotel, where known, are filled to overflowing. A new hotel is indispensable, and it must be a large one, for next filled at current prices. [Sent.] feb 28year's business. So much for our one-horse town."

EXCELSIOR NO. 1 PERUVIAN GUANO

SOLUBLE PHOSPHATE, Commonly known as EXCELSIOR DEBURG,

CONTAINING Ammonia, 6 per ct.; Phosphates, 57 per cent., composed of 700 pounds of No. 1 PERUVIAN GUANO, and 1300 pounds of SOLUBLE PHOSPHATE OF LIME, Potash, Soda, and Magnesia, forming the most concentrated and durable FERTILIZER ever offered to the Farmer, combining all the stimulating properties of Peruvian Guano, and the durable fertilizing dance of Ammonia for any crop and all soils, and in a perfectly fixed condition-not volatile, and passing off with the first crop as with Peruvian ones, giving to poor, worn out and unproductive

soils, new life and vigor.

It furnishes to the soil Soluble Phosphate of Lime, (Bones dissolved in Sulphuric acid) in a Mouslins, &c., &c. perfectly available form, ready food for the plant at once; a fact of great importance to the Farmer; as the immediate action and efficacy of all manures, depends entirely upon the solubility of their Phosphates. Bones are alone used in the manufacture of this article, avoiding altogether the use ble portion of whose Phosphates are of Iron and ble portion of whose Phosphates are of Iron and Alamaiea, which are utterly valueless to the Silk, Satin, and Marseilles VESTINGS, Shirts,

The EXCELSIOR also supplies to the soil, Potash, Soda, and Magnesia, which are extracted returned, or the soil will become impoverished and exhausted, notwithstanding the application of

Guano and other Manures deficient in Alkalies. This article has been tested for several years (Linen for Window Blinds, Green and Buff,) Furpast with Peruvian and other Guanos, and now Manure for any crop common to this region. Nu- Cloths, &c., &c. merous certificates to that effect furnished on ap-

plication.

Every package is warranted to be uniform in quality, and to contain by analysis, the standard of fertilizing properties. Farmers should see that every package bears in red letters the name of J. J. & F. Turner, under the inspection-none other genuine. Price \$47

per 2000 pounds. For sale in any quantity, by JAMES C. NEVETT, Sole Agent for Alexandria. FOWLE & CO., Alexandria, Va.,
